

Small Block Ford Smart Coil Mounts

In this picture, on our shop car, our Smart Coil Mounts use Holley Smart Coils. However, most Smart Coils feature the same bolt pattern, so our Smart Coil Mounts are compatible with most aftermarket LS-style coils.

FFP Customs Small Block Ford Coil mounts are made from lightweight 6061 aluminum to provide a solid mounting provision for aftermarket Smart Coils to your 5.0L or 5.8L Small Block Ford engine. Why would someone want LS-Style Smart Coils on a Ford Small Block, you ask? That's because many aftermarket ignition and engine management companies have started to use that style of ignition coil. In a nutshell, adding aftermarket ignitions and engine management systems using LS-style Smart Coils is all the rage. However, when it comes to mounting those Smart Coils, your choices have been limited – until now.

Our Small Block Ford Smart Coil Mounts include everything needed to install the coil mounts, including the Smart Coil bolts, as well. You'll need a ratchet, a 7/16 socket, and a 5/32 Allen wrench. A 7/16 wrench will also work for the Smart Coil Mount bolts.

Here we have a classic GT-40P head with a standard valve cover installed. This is one of our display pieces we take to shows and events. To install the Smart Coil Mounts, simply use the two provided spacers, the longer bolts in the hardware kit, a washer for each bolt, and the Smart Coil Mount itself. Here is where you will need your 7/16" socket and ratchet, or wrench.

Here is a close-up of the spacer, bolt, and washer arrangement for the Small Block Ford Smart Coil Mounts. Our Small Block Ford Smart Coil Mounts use the top bolt holes on each side of the head/valve cover for attachment. On our own Ultra Street car, this is the finished product. Our Smart Coil Mounts can also be flipped side-to-side to accommodate front or rear breather fittings. We have these Small Block Ford Smart Coil Mounts on everything from ground-pounding hot rods to full-on race cars.

Like all our products, these Small Block Ford Smart Coil Mounts are designed to bolt on with little drama or confusion. The straightforward installation of these Smart Coil Mounts should only take a few minutes, using basic hand tools.

If you have made it this far, we trust you have installed the Small Block Ford Smart Coil Mounts with relative ease. However, if you have hit a snag or have questions, don't hesitate to contact us via phone or social media. We would rather you call us for clarification instead of being frustrated with the installation.

Like all FFP Customs products, these Small Block Ford Smart Coil Mounts are designed and made here in the USA.
